134073 and 134074. EUCALYPTUS spp. Myrtaceae.

From Australia. Seeds presented by R. G. Kappler, Secretary, Commonwealth Forestry Bureau, Canberra, through Woodbridge Metcalf, Extension Forester, College of Agriculture, Berkeley, Calif. Numbered in September 1939.

134073. EUCALYPTUS NIPHOPHILA Maiden and Blakely.

A small crooked alpine tree or shrub 3 to 20 feet high, with several whiplike glaucous stems from a large woody rootstock. The bark is usually smooth and white. The mature leaves are alternate, petiolate, lanceolate to lanceolate-falcate, thick, leathery, shining, 1 to 3 inches long. The inflorescence is in short axillary umbels of 3 to 10 flowers. Native to alpine regions of New South Wales and Victoria, where it is subjected to several degrees of frost.

134074. EUCALYPTUS DE BEUZEVILLEI Maiden.

A medium-sized or large tree up to 60 feet high, more or less glaucous, with more or less rough bark, flaky at the base. The mature leaves are lanceolate, slightly falcate, fragrant, thick, slightly shining, about 5 inches long. Native to alpine regions of New South Wales where it is subject to frost in the winter season.
